RENAME RESEARCH · 12 NOV 2026

A new name for PlayDen

A broad search for a name that is easy to spell, easy to say and easy to remember, for a private game-night site used by a mixed, English-speaking crew in India. Every name was checked for free domains, and the shortlist was checked for clashing apps, games and trademarks.

736	4,416	75	10 + 6
names generated and checked	domain lookups across 6 extensions	names researched for clashes	finalist names + phrases

Bottom line. Most friendly English words are already used by a game, an app or a trademark. Ten single names and six welcoming phrases came back clean, and many keep the cozy, gather-round feeling you liked in PlayDen and Baithak.

My top three: PlayLair, **Front Room**, **Sitting Room**. PlayLair is the closest relative of PlayDen (a lair is a den) and keeps your P logo. Front Room and Sitting Room are the plain-English versions of Baithak that anyone can spell after hearing them once.

Phrase names: Invitations like Pull Up a Chair, Come Sit and Stay Late work well. Pull Up a Chair keeps your P logo and has every cheap domain free. Have a Seat itself is usable but already names two reservation apps.

726 of 736 names have at least one domain free, but only 2 have a free .com. Short English .com names are almost all registered, so the realistic choice is a newer extension (.meme, .app, .club, .games or .fun).

How the names were judged

1. Easy for everyone. Each finalist is scored 1–5 on how easy it is to spell after hearing it once, to say out loud, and to remember the next day. Names with spelling traps (parlour/parlor, hooray/hurray) lose points.

2. No clashes. Research agents checked each name against Google Play, the App Store, Steam and itch.io, the web, and US trademark records in classes 9 (apps), 28 (games) and 41 (entertainment).

3. A cheap domain is free. The domain was checked with the official registry lookup (RDAP) or DNS on 12 Nov 2026.

Clash risk	Meaning
None found	Nothing relevant turned up
Low	Same name only in unrelated fields, or tiny inactive projects
Medium	An active app or game nearby, or a live games/apps trademark by a small owner
High	An established same-name game, app or social product, or a big brand

What each domain costs per year

Extension	Renewal (Porkbun)	≈ Rupees	Notes
.meme	$10.81	~₹950	Run by Google, clean reputation, same price every year
.com	$11.81	~₹1,040	The most trusted, but only 1 of 680 names had it free
.app	$14.93	~₹1,310	Run by Google, trusted, HTTPS-only (your site already is)
.club	$15.96	~₹1,400	Fine to use; had some spam history in the past
.games	$30.38	~₹2,670	On-theme, but costs about 3× more
.fun	$31.41	~₹2,760	On-theme; cheap first year, then the price jumps

Prices are Porkbun's renewal prices; Cloudflare is similar or cheaper where it sells the extension. Rupees use ~₹88 per $. Some short dictionary words are "premium" and cost more. The registrar shows this at checkout, so check the price before paying.

Buying the domain safely

1. **Pick 2–3 favourites** and share them with your test group to see which one people remember and spell correctly.
2. **Recheck the winner** on the registrar's site, including whether it's marked "premium", and on Google Play the week you buy. Names get taken.
3. **Buy at Porkbun or Cloudflare**, typing the address yourself. Skip every add-on: hosting, email, SEO, site builder. WHOIS privacy should be free.
4. **Pay 2–3 years upfront.** Indian cards often fail auto-renew because of RBI e-mandate rules. Also set a calendar reminder a month before expiry.
5. **Turn on two-factor login** at the registrar and keep your account email current.
6. **Ignore any call, WhatsApp or email** about your domain that isn't from your registrar's own dashboard (fake renewal invoices, "someone wants your name in China", SEO offers).
7. **Then rename everything in one go**: code and logo, then the Cloudflare Worker, Google sign-in and GitHub, in an order that keeps sign-in working.

Limits of this research

- Trademark findings come from public aggregator sites (Justia, Markinton, Trademarkdir), not directly from the US or Indian trademark offices. India's register (IP India) was not searched automatically. Search the winner there by hand: Public Search, word mark, classes 9, 28 and 41.
- This is research, not legal advice.

- Domain status is as of 12 Nov 2026. Finalists were confirmed with the official registry lookups (RDAP), except .games, whose registry was throttling lookups; .games was checked by DNS, which is accurate in practice.
- Google Play search shows names and developers but often not download counts, so app sizes are approximate.
- Common words (Front Room, Sitting Room) can't be owned as trademarks easily, which also means nobody can stop you using them, but you can't stop others either.

Appendix: all 736 names and their free domains

The letters show which domains were free when checked: **c** .com · **m** .meme · **a** .app · **b** .club · **g** .games · **f** .fun. A dash means none of the six were free. Non-shortlisted names were checked by DNS (a fast first pass), so recheck a name at the registrar before buying.
